## WORK EXPERIENCE

02.2025 - now

### SENIOR SOFTWARE DEVELOPMENT ENGINEER

Kgate Technologies Inc, remote

Providing support and driving the development of a multi-service ecosystem, including CRM, TDS, eCommerce, and Dating platforms, ensuring seamless integration and optimized performance across services.

Technical stack: Symfony · CQRS · DDD · REST APIs · microservices · Elastic search · PostgreSQL · Code review · Estimation · AI · GitLab · AWS · Twig · 3rd part services integration

09.2024 - 03.2025

### SENIOR PHP DEVELOPER

Hubmee, remote

Supporting and developing of functionality (Google calendar sync...) for hubmee.com

Technical stack: PHP8.1, Laravel 10, Docker, Composer, Bitbucket, AWS, MySQL, REST APIs, 3rd parties, Confluence, Jira, Slack

Supporting and developing of functionality (Google calendar sync...) for hubmee.com Technical stack: PHP8.1, Laravel 10, Docker, Composer, Bitbucket, AWS, MySQL, REST APIs, 3rd parties, Confluence, Jira, Slack

Technical stack: PHP · Laravel framework · AWS · MySQL · Docker · Composer · Bitbucket · Google calendar API · REST APIs

02.2024 - 11.2024

### SENIOR SOFTWARE ENGINEER

Stfalcon LLC | Mobile & Web App Development Company remote

#### Backend / Integration Developer – MAUDAU

Worked on ongoing support and development of MAUDAU – a fast-growing Ukrainian online marketplace and digital supermarket offering everyday goods, groceries, electronics, beauty and home products in a unified e-commerce platform. I contributed to feature development, platform enhancements, integration with delivery services (e.g., Nova Poshta), and improving overall system reliability and performance.

#### Backend / Integration Developer – Nova Poshta

Supported and developed backend functionality for Nova Poshta (Nova Post) – Ukraine's leading private postal and logistics company providing express parcel, document and freight delivery services domestically and internationally. This included working on system integrations, data exchange processes, API enhancements, and infrastructure support to ensure seamless logistics operations.

Technical stack: Symfony · Yii2 · microservices · TDD · PHP · Docker · REST APIs · Redis · PostgreSQL · Mongo

01.2021 - 11.2024

### SENIOR PHP DEVELOPER

Bintime, Kiev (Product/outsource company)

#### Contributing to a service-oriented, event-driven ecosystem that connects multiple B2B e-commerce portals. The project focuses on reliable data-sharing mechanisms, event-driven workflows, and microservice-based integration, enabling seamless communication between platforms and ensuring high availability, data consistency, and scalability.

Technical stack: REST APIs · Redis · Symfony · CQRS · Mongo · DDD · PHPUnit · Unit tests · SNS · SQS

#### Contributing to Gepard.io, a next-generation Product Information Management (PIM) platform that empowers organizations to manage and automate product content across global sales ecosystems. The solution reduces manual work, improves operational efficiency, enables rich content syndication, and ensures consistent, compliant product data delivery across all channels.

Technical stack: REST APIs · Redis · Yii2 · PostgreSQL · Clean architecture · 3rd part services
